

# How To Print XML Bill In Another System Printer

## Step1: Change Client Computer User Name As Same As Server

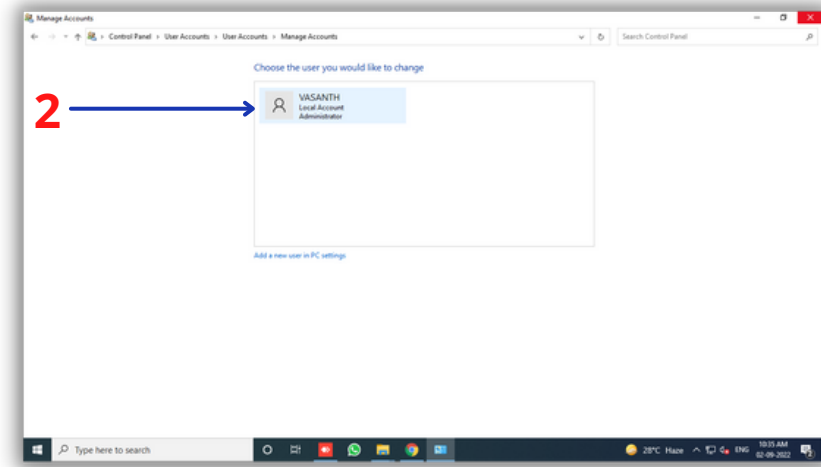

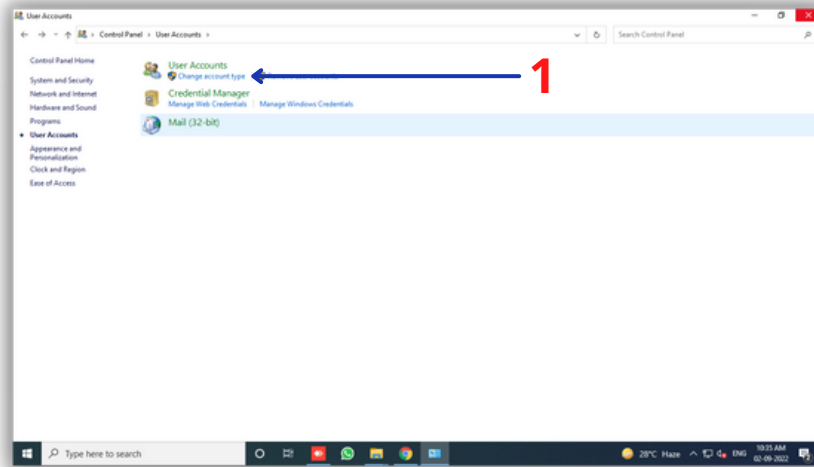

Go to Control Panel->

Rename the Computer with same name where printer is connected.

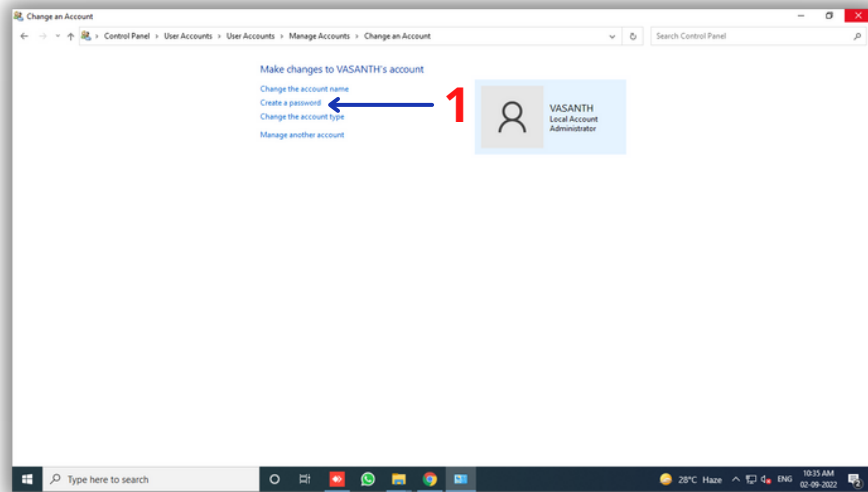

## Step2: Give Same Password In All Computer

### Control Panel->User accounts->Change account Type

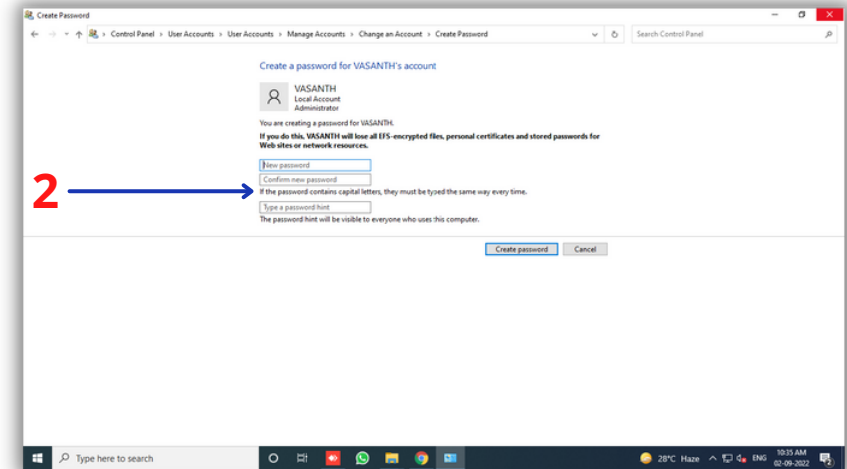

1 → Click Change Account Type

2 → Click Administrator

1 → Click Change Password

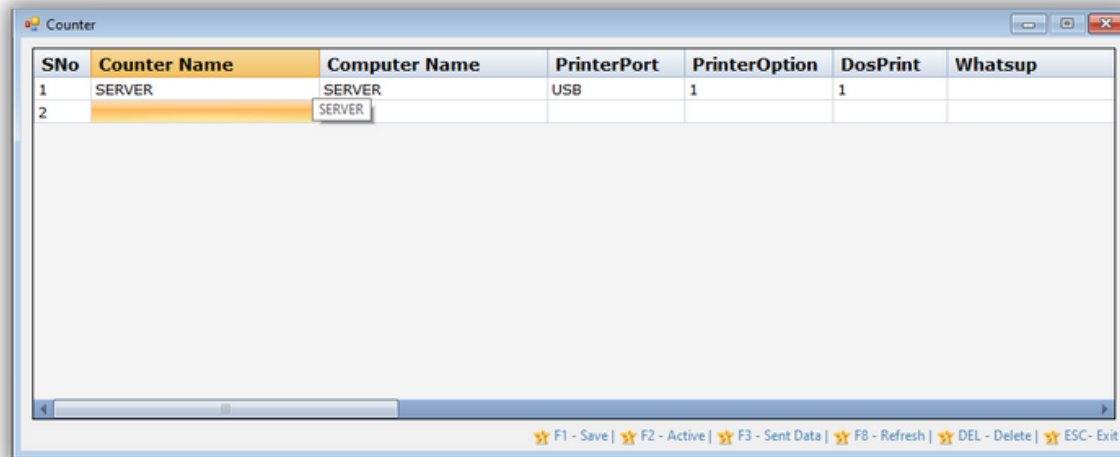

2 → Enter The Password And Save

**Note:** You must set same Password in all computer where you want to print

## Step3: Now Open The Exe And Check The Counter

Open EXE->Master->Counter

SNo	Counter Name	Computer Name	PrinterPort	PrinterOption	DosPrint	Whatsup
1	SERVER	SERVER	USB	1	1	
2	SERVER	SERVER				

1. In Counter Check The Computer Name
2. In All System Enter The Same Name as Counter Name
3. Now Bill the print in Client System. If the Bill is coming the Network PrintXML Done
4. If the Bill is not printing then check the Computer Name And Password is same.
